Nataliia Liubynets

Junior Front-End Developer

Location: Warsaw, Poland   **Email:** liubynets.nataliia@gmail.com   **Profiles:** Linkedin | Github

Summary

Motivated Entry-Level Front-End Developer with a strong foundation in HTML, CSS, JavaScript, and React. Completed hands-on projects, showcasing skills in responsive design, component-based architecture, and API integration. Eager to contribute to a collaborative team and grow within a dynamic development environment.

Technical Skills

Core: HTML, CSS, JavaScript, React, Context API, Redux Toolkit, React Router, Tailwind CSS
Testing & Tools: Jest, React Testing Library, Zod, Git
Deployment & CI/CD: GitHub Pages, Vercel
Familiar: Node.js, MongoDB, Express.js, Swagger, TypeScript, Next.js, Agile

Certifications

AWS Cloud Quest: Cloud Practitioner – AWS
AWS Knowledge: Cloud Essentials – AWS

Training & Education

Academind by Maximilian Schwarzmüller
React – The Complete Guide (Udemy, 2025)
EPAM UpSkill Program
Front-End and JavaScript (Intermediate Level)
TypeScript
IT Fundamentals
Lviv Polytechnic National University
Bachelor's & Master's Degrees (Law)
Developed strong analytical thinking and problem-solving skills applicable to software development.

Projects

QuickQuiz AI – **Live Demo** | **Github**
AI-powered quiz app using Gemini AI for personalized learning. Built with Next.js, Redux Toolkit, and Jest.
Key Features:
- AI-generated quizzes with adjustable complexity
- Real-time scoring, feedback, and performance analysis
- Modal-based UX for smooth interactions
- Responsive design with strong test coverage
Tech Stack:
- Next.js for frontend and routing
- Redux Toolkit for state management
- Jest + React Testing Library for unit testing
- Google GenAI (Gemini) for quiz content generation
- CSS Modules for scoped styling
- Vercel with Git-based CI/CD automation.

Ukrify Chrome Extension – **Chrome Web Store** | **Github**
Chrome extension for real-time conversion of English keyboard input to Ukrainian layout, enhancing productivity for bilingual users.
Key Features:
- Converts mistakenly English text to its Ukrainian keyboard equivalent.
- Supports direct text replacement within input fields, text areas, and rich content-editable elements across various websites.
- Offers one-click copy-to-clipboard functionality for converted text, alongside direct insertion, streamlining user interaction.
- Dynamically displays a pop-up panel and action button on text selection, adapting to different web page layouts and screen sizes.
- Provides clear user guidance and fallback options (e.g., "Copy" prompt) when direct text insertion is not feasible.
Tech Stack:
- Vanilla JavaScript for core logic
- CSS for styling
- Clipboard API for copy-to-clipboard functionality

- Vite for rapid development and bundling

Job Tracker – In Progress | **Github**
Full-stack application built to streamline the job search process by allowing users to track and manage job applications in one centralized dashboard.
Key Features:
- User authentication with login and registration
- RESTful API for job and auth management
- Interactive login and sign-up forms with validation
- Swagger documentation for backend API
- Seamless API communication using Axios

Tech Stack:
- Express.js and MongoDB for backend development
- React 19 + Vite for frontend
- React Hook Form + Zod for form validation
- Tailwind CSS for responsive UI design
- Axios for client-server communication

In Progress:
- User dashboard with job tracking features
- CRUD operations for job entries
- Role-based access control and protected routes
- Fully responsive design for all devices

Languages

Ukrainian – Native proficiency
English – Professional working proficiency
